› Backup2Go is the easy solution for laptops and workstations. While you work, your data is saved in the background. In order to restore, pick a snapshot from the timeline and any file you need.

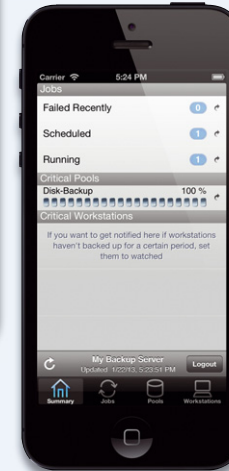

› Complete configuration in three easy steps. All platforms, all modules, one browser interface.

› Media previews bring your archive to life. Browse and search files and metadata. Restore from the browser.

› P5 mobile lets you monitor your P5 servers on the go.

› Check storage, Jobs and Backup status of critical workstations.
